

IT TECHNOLOGY MAKES THE JOURNEY OF AVOCADO FROM PERU TO CHINA COME TRUE

According to the latest data, China imported 43.9 tons of avocado a year in 2020. In 2011, the number was only 31.8 tons. This increase in 8 years surely make avocado a rising star in the Chinese fruit market! To seize the huge market opportunities in China, Peru's largest agribusiness and avocado grower Camposol needed to improve its global operations capabilities through IT technology; in their global system deployment plan, China's localization has become a top priority.

The epidemic Covid-19 restrictions on long-distance travel didn't help the start of the project to get any easier, nor challenges such as international fiscal or taxation requirements. Camposol's IT supplier Seidor needed to work with the local Chinese United VARs partner QZing with strong technical capabilities.

PROJECT OVERVIEW:

KEY CHALLENGES

- Epidemic restrictions on long-distance travel in 2020
- Localization in China: international fiscal, local taxation requirements, language barrier

customers by maintaining the structure of localized reports, table samples, table samples for voucher printing, account hierarchy and so on.

- All the reports and accounting documents fits the audit request and can be used directly for auditing.

ADDED BENEFITS FOR CAMPOSOL

- Implement the Chinese golden tax interface in SAP Fiori, realized the connection between the SAP system and the Chinese golden tax system. Allow users to issue VAT invoices based on the SAP billings easily and meet the requirements of the Chinese golden tax system at the same time.
- Standardized the management of master data with Seidor according to the customer's requirements to make business follow more smoothly and accurately.
- Realize the function of Chinese localization report form and accounting voucher printing not only comply with the requirements of Chinese accounting standards, but also to meet the special requirements from
