

IBERCHEM CONSOLIDATED ITS GLOBAL ACCOUNTING DATA WITH SAP IN A SINGLE FINANCIAL YEAR

Iberchem Group bet hand in hand with Seidor, and its global network of leading SAP Partners called "United VARs", for the implementation of SAP Business Suite ECC with three objectives: To strengthen its position in the international market of fragrances and aromas, to increase security in critical business processes, and maintain a stable and common database for all subsidiaries of the Group.

PROJECT OVERVIEW:

KEY CHALLENGES AND OBJECTIVES

- To have a flexible technology platform that would enable the company's continued strong international growth.
 - To seek a homogenisation of processes among all the business areas and the different subsidiaries of the group.
 - To integrate, within in a single solution, financial information and administrative management, as well as the coordination of technical projects, from the creation of a formula to the exit of the finished product from the warehouse.
 - Seidor had to coordinate the project in a variety of different countries with different legal & local requirements: China, Colombia, Indonesia, India, Mexico, Italy, South Africa and Dubai. In India, Answerthink - The Hackett Group - was the respective United VARs partner.
- The implementation of SAP Business Suite ECC, and the successive roll-overs, have allowed us to have a homogeneous working system at a global level with multi-currencies and multi-languages.
 - Increased efficiency and reduced interruptions with a proactive, preventive and corrective maintenance.
