OSC SMART INTEGRATION IS THE UNITED VARs MEMBER FOR GERMANY WITH SAP EXPERTISE IN BUSINESS ONE

MORE: <https://www.united-vars.com/en/partners/osc-smart-integration>

OSC Smart Integration delivers business solutions for mid-market companies. Structures and processes in small and medium-sized enterprises are not simpler but sometimes even more complex than in large enterprises. The situation is quite different looking at the workforce. When medium-sized enterprises have their own IT department or a computer specialist, the resources are limited in smaller companies. In addition to that, the limitation of budgets for IT investments almost prevent flexibility. Nevertheless, major reasons such as ongoing growth or economical changes should not make companies invest into new ERP solutions or adapt them continuously. The company-specific reasons such as steady growth or changing economic conditions should not be the reasons to invest in new ERP software solutions, or to adapt them repeatedly.
