WINTERHAWK IS THE UNITED VARS GLOBAL SOLUTION PARTNER FOR SAP CYBER, IDENTITY, GRC & SECURITY

MORE: <https://www.united-vars.com/en/partners/winterhawk>

Winterhawk helps organizations of all sizes to secure their SAP systems and data, as well as innovating for process efficiency.

Safeguarding data has never been more challenging. The risks of cyber crime, internal and external fraud are growing exponentially year on year. If you run SAP ECC, S/4HANA or SuccessFactors then your system will inherently have sensitive data and access risks. Don't be the next company exposed to regulatory fines, ransoms, money laundering, or IP losses – not to mention the brand and reputational damage that comes with negative publicity.
